Fifteenth Annual Announcement

OF THE

FORT WAYNE

COLLEGE OF MEDICINE.

---

FORT WAYNE, INDIANA.

Session 1893-4.

---

## Board of Trustees.

---

CHAS. McCULLOCH, Esq.

President Hamilton National Bank.

MONTGOMERY HAMILTON, Esq.

Director Hamilton National Bank.

HON. ALLEN ZOLLARS,

Ex-Judge Indiana Supreme Court.

DAVID N. FOSTER,

President Foster Furniture Company.

# Faculty.

---

I. ELLIS LYONS, A. M., M. D., HUNTINGTON, IND.

Emeritus Professor of Obstetrics.

CHRISTIAN B. STEMEN, A. M., M. D., LL. D., Dean, 25 BROADWAY.

Professor of Surgery and Clinical Surgery.

WALTER W. BARNETT, M. D., Secretary, 434 SOUTH CALHOUN ST.

Professor of Anatomy.

GEORGE W. McCASKEY, A. M., M. D., 107 WEST MAIN ST.

Professor of Theory and Practice of Medicine, and Clinical Diseases of the Chest and Nervous System.

KENT K. WHELOCK, M. D., 26 WEST WAYNE ST.

Professor of the Diseases of the Eye and Ear.

GEORGE B. STEMEN, M. D., 300 WEST MAIN ST.

Professor of Obstetrics.

ALPHEUS P. BUCHMAN, M. D., 161 WEST WASHINGTON ST.

Professor of Physiology, Clinical Medicine, Rhinology and Laryngology.

CHARLES R. DRYER, A. M., M. D., MAPLE AVENUE.

Professor of Chemistry and Toxicology.

MILES F. PORTER, A. M., M. D., 47 WEST WAYNE ST.

Professor of Surgery, Gynaecology and Clinical Surgery.

JOSEPH L. GILBERT, M. D., KENDALLVILLE, IND.

Professor of Theory and Practice of Medicine.

WILLIAM O. GROSS, PH. G., M. D., 159 WEST WASHINGTON ST.

Professor of Materia Medica and Pharmacy.

GEORGE C. STEMEN, A. M., M. D., 493 SOUTH CALHOUN ST.

Professor of Therapeutics.

T. J. DILLS, M. D., WEST BERRY ST.

Lecturer on State Medicine and Hygiene.

B. VAN SWERINGEN, M. D., 120 CALHOUN ST.

Professor of Diseases of Children.

HERMANN DUEMLING, M. D., 100 BARR ST.

Demonstrator of Anatomy.

LOUIS SCHMIDT, PH. C., 120 CALHOUN ST.

Assistant Demonstrator of Chemistry.

## Fifteenth Annual Announcement.

---

In the Fifteenth Annual Announcement of the FORT WAYNE COLLEGE OF MEDICINE, the Trustees point with pride to the crowning achievement of their labors in the possession of a building and grounds, the title to which is vested in the Fort Wayne College of Medicine Association. The building, the cut of which appears on the front page of this Announcement, was the old homestead of the Hon. Hugh McCulloch, ex-Secretary of the United States Treasury, and is situated on the banks of the St. Mary's River, fronting West Superior street. It is in the residence part of the city, within two blocks of the St. Joseph Hospital and one block from the Main Street and Belt Line Electric Street Railway.

The grounds have a frontage of 95 feet and extend back 150 feet, and afford ample area for further enlargement of the building to meet all the necessities which may arise. During the past summer the interior was entirely removed and a beautiful semicircular amphitheatre constructed with a seating capacity for one hundred and ten students. The heating and lighting of the entire building is by natural gas, and the ventilation is the most perfect attainable.

The Faculty of the Fort Wayne College of Medicine have an individual interest in the prosperity of the school, and have succeeded in placing it upon a basis which shall be as enduring as vested rights in property can make it. The Trustees have labored for fourteen years against all kinds of adversity, till at last they have procured a fixed habitation which shall secure to its alumni all the advantages belonging to a permanent and growing institution. The attendance of the last session shows in its increased numbers the appreciation by the profession of the efforts of the Trustees in providing every facility for thorough work in every department.

## ❖ ❖ The Departments. ❖ ❖

---

### THE ST. JOSEPH HOSPITAL

This magnificent institution, covering an area of one-half of a block and fronting on three streets, Broadway, Main and Van Buren, is an imposing structure in its architectural appearance, and has been built solely in response to the increasing demands of this territory. The interior is fitted with every contrivance for modern surgical work, and stands second to none for efficiency in trained nurses. Its general surgical amphitheatre is built with special reference to the needs of the College. The floor is of glazed tile, while the walls are of polished wood. All apparatus for antiseptic surgical work is at hand, and the light is so disposed that all may see every step in operations being performed. There are one hundred beds in active use, and room for many more as necessity may demand. The injured of three railroads are cared for at this hospital, and all manner of injuries incidental to railway casualties are treated by the students under the direction of the Professors of Surgery. The hospital is reached by the Main Street and Belt Line electric cars.

### HOPE HOSPITAL

Hope Hospital is situated at the intersection of Barr and Washington streets, and only one square from two electric car lines. It is very accessible for ambulance cases, and is often the scene of capital operations by the surgical staff. A considerable extension has been added to the building, doubling the former capacity of the hospital, thus rendering it very commodious for the fine clinical demonstrations carried on there.

### THE FREE DISPENSARY

Recognizing the need of a dispensary where the poor could be given medical attention free of charge, at the same time benefiting the students of our college, this beneficent institution was organized by the younger members of the college and is maintained by the citizens of Fort Wayne. The dispensary room is in the west wing of the college building, and is under the supervision of the dispensary staff organized from the faculty. The dispensing and compounding of the medicines is under the immediate supervision of Mr. Louis Schmidt, Pharm. Grad., and here will be learned many things of a practical nature which will be useful to those who expect to compound and dispense their own medicines. The dispensary will be open every morning from 8 to 9 o'clock, thus practically giving the students a daily clinic.

## LABORATORIES

Normaly Histology and Microscopical Urinalysis will be taught by the Professor of Histology. The laboratory is thoroughly equipped with first-class instruments and all apparatus necessary for the thorough study of this very important branch of medicine, and every student must become familiar with the use of the microscope.

## PRACTICAL CHEMISTRY

A thorough knowledge of chemistry is absolutely necessary to the successful practice of medicine, and while an extended course covering the entire domain of organic, inorganic and medical chemistry and toxicology will be given, the subjects will be so divided as to give the student the most comprehensive knowledge of chemistry with the least expenditure of time. Therefore the first year's class will devote its time to the study of inorganic chemistry, qualitative analysis, bases and acids. The students of the second year are taught organic medical chemistry, urinalysis and toxicology, and the examination of food and water. Each student must do his work in such a manner that he can carry the technique to the bedside and apply it in daily practice.

Pathology and bacteriology are taught practically. The methods of examining and preparing specimens are taught by the Professor of Pathology.

## PRACTICAL ANATOMY

Every branch of anatomy will be thoroughly taught and demonstrated. The Professor of Anatomy will personally direct the demonstrations, giving students the double advantage of his instructions, not only in his didactic lectures but also on the cadaver. He will be assisted by a competent staff of demonstrators.

The new Anatomy Hall, specially built, combines every convenience for dissections and operations; is well ventilated, lighted and drained, and lacks none of the modern improvements in such structures.

## RAILWAY SURGERY

The Professors of Surgery, who are surgeons to several railroads entering Fort Wayne, will deliver special lectures on the accidents and emergencies incidental to the practice of the railway surgeon. The alumni of this college have been very successful in obtaining appointments in this capacity.

## DIAGNOSTIC AND SURGICAL TECHNIQUE

One of the most notable arrangements of this college is its provision for practical instruction in the use of diagnostic instruments, and in surgical dressing. It is the determination of the Faculty that every

student shall be familiar with the microscope, ophthalmoscope, rhinoscope, otoscope, laryngoscope, stethoscope and other instruments of precision, and proficient in surgical technique and minor surgery. A special class for the teaching of these objects will be formed at the beginning of the session, and, while the senior students cannot fail to take this course, it is recommended that it be taken in the second of the three years of study.

## HYGIENE

Heretofore in this college a course of lectures on Hygiene and State Medicine has always been given during the session, and attendance at the lectures and examinations was optional. By a resolution of the Faculty attendance on a course of lectures on Hygiene is now made compulsory for candidates for the degree.

## PHARMACY AND PHARMACOLOGY

The increasing importance of a practical acquaintance with drugs and the art of preparing and compounding them has induced the Faculty and Trustees to create a Chair of Pharmacy, and students in their first or second year, should take this course, which is now a compulsory subject in this college. It will be found that the study of Materia Medica and Therapeutics will be rendered more facile and profitable in conjunction with Pharmacy and Pharmacology.

## BOARD AND LODGING

There are many excellent boarding houses in the immediate vicinity of the college. On reaching the city students should go at once to the office of the Secretary, at No. 434 South Calhoun street, where he will be furnished with directions for boarding houses. The rate per week varies, of course, with the accommodations, and can be found from three dollars upward. In many instances, heretofore, students have gone even below this figure. Clubs may be formed at which board may be had at the smallest cost.

## CORRESPONDENCE

Students, when writing for information, are requested to address W. W. Barnett, M. D., Secretary, 434 S. Calhoun street, or C. B. Stemen, M. D., Dean, 95 Calhoun street, Fort Wayne, Ind.

Students should arrange to get here very early in the season, as the accumulation of clinical material during the summer renders the first few weeks in the session especially rich in clinical instruction, and for the further reason that seats will be assigned as students matriculate.

## NEW CURRICULUM OF STUDY

According to notice given in Announcement 1891-2, the Faculty have instituted a course of studies involving attendance at three full sessions of the college. A graded course is prescribed and strongly recommended to students, but each may choose either the general or the graded course. This new curriculum is obligatory on all students who matriculate in the session of 1892-3, after July, and subsequently. It is in accord with the demand of the profession and the public for the elevation of the standard of medical education. The Medical Boards of most States now require a minimum of three years college study to qualify a graduate for practicing medicine in their respective jurisdictions.

It is suggested that first-year students attend the didactic lectures on all subjects and the hospital clinics, so as to obtain early a comprehension of the whole scope of their medical studies.

In the second year students will give particular attention to subjects in which there is a final examination at the end of the term.

## THE GRADED COURSE

FOR THE FIRST YEAR—Anatomy and Dissections, Physiology, General Chemistry, Materia Medica and Pharmacy, Clinics in College, Hospital and Dispensary.

FOR THE SECOND YEAR—Descriptive Anatomy and Dissections, Surgical Anatomy, Physiology, Histology and Microscopy, Medical Chemistry and Toxicology, Materia Medica and Therapeutics, Practice of Medicine and Physical Diagnosis, Surgery and Minor Surgery, Obstetrics and Gynaecology, Paediatrics, Dermatology and Clinics.

FOR THE THIRD YEAR—Practice of Medicine and Clinical Medicine, Surgery General and Clinical, Paediatrics and Gynaecology, Pathology, Medical Jurisprudence, Ophthalmology and Otology, Rhinology and Laryngology, Neurology and Bacteriology.

## PRELIMINARY REQUIREMENTS

Each student before matriculation must present satisfactory evidence of proficiency in the fundamental branches of an English education. To be admitted without examination, the applicant must show proof of matriculation in a literary or medical college which exacts a preliminary examination, or present evidence of having attended an academy or high school. The Medical College Association is demanding more thorough preliminary education, and medical colleges all over the country are encouraging these demands.

## ADVANCED STANDING

Students will be admitted to the second year's course who comply with the preliminary requirements of admission and who present satisfactory certificates of attendance upon one full course of lectures from a recognized medical college, together with evidence of examination in the studies prescribed in the first year of the graded course of that college. Otherwise examination in the studies prescribed in the first year of the graded course in this college will be necessary.

Any student who has taken two or more courses at this or another recognized medical college, may be admitted to the third year's course by passing an examination in Anatomy, Physiology, Materia Medica and Chemistry, unless proof be presented of having first passed the examination in these branches in an accredited college. Graduates of regular and recognized colleges may enter the third grade without examination; and after taking the third year's course in this college, will receive the degree of Doctor of Medicine on passing the examination in Practice of Medicine, Surgery and Obstetrics.

## REQUISITES FOR THE DEGREE OF DOCTOR OF MEDICINE

The candidate must be twenty-one years of age and of good moral character; must have studied medicine three (3) full years, and studied three winter terms in a medical college, the last term being in this institution; must have dissected two sessions and received practical instruction in the Chemical, Histological and Bactereological Laboratories; must have paid in full all college dues, including the final examination fee; and must have passed examinations in all branches of medicine taught in this college to the satisfaction of the Faculty.

The degree will not be conferred on any candidate absent, without permission, from the Public Commencement.

## FEES

Matriculation, (payable but once,)	\$ 5 00
General Lecture Fee, annually, *	40 00
Dissections, each year for two years,	5 00
Chemical Laboratory, annually,	5 00
Hospitals and Dispensary, annually,	5 00
Examination Fee, not returnable,	25 00
Pathology and Bacteriology,	5 00
Normal Histology,	5 00
Any Single Course,	10 00

\*Students who have paid the general lecture fee for two full courses—one, at least, in this college, pay \$20 for the third course.

Fees must be paid in advance, and promissory notes cannot be received.

All fees must be paid to the Treasurer of the Faculty, and his receipt is requisite as evidence of such payment, to be produced before admission to the examination for the degree.

No ticket or other certificate of attendance upon the college exercises will be issued to any student until the end of the term, and until all dues have been paid.

Students who have paid for three full courses in this college will be admitted to any subsequent course by paying a matriculation fee.

Persons desirous of taking instruction in Practical Anatomy, Histology, Chemistry, or any special course, are permitted to do so on the payment of the fees for the respective course together with the matriculation fee.

The general lecture fee will be reduced one-half in favor of graduates of other medical colleges who attend a course of instruction in this college.

### TEXT BOOKS

[Authors adopted as standard are printed in italic.]

*Anatomy*—Wiesse, Gobrecht's, Wilson, *Gray*.

*Chemistry*—Witthavs, Leffman, *Attfeld*.

*Physiology*—Foster, Flint, Dalton, Yoe, *Kirk*, Serm, Moulin.

*Surgery*—Ashurst, Agnew, Wythe, Gross, Stemen.

*Practice*—Flint, Pepper's System, Roberts, Fagge, *Osler*.

*Obstetrics*—Hodge, Cazeaux, *Playfair*.

*Materia Medica*—Ringer, H. C. Wood, Potter, *Bartholow*.

*Genito-Urinary Diseases*—Action, Curling, Milton.

*Diseases of Women*—Thomas, Byford, Winckel, *Skene*.

*Diseases of Children*—Condie, Smith, Starr.

*Eye and Ear* { *Diseases of the Eye*—Wells, *Noyes*.  
                  { *Diseases of the Ear*—Burnett, Roosa, *Buck*.

*Pathology*—Ziegler, Gilliam, Green,

*Nose and Throat*—Cohen, Semeleder, Robinson.

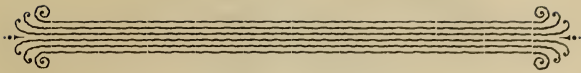

*Skin Diseases*—Anderson, Fox, Shoemaker.

*Medical Jurisprudence*—Reese, Taylor.

*Medical Electricity*—Althaus, Bartholow,

*Pharmacy*—Remmington.

In order to facilitate the recitative plan of study to be largely adopted in this school, the Faculty have selected a standard text book in each branch of medicine and hope eventually to conform to it. Any of the books above listed, however, will be accepted.
